

ANJALI

Data Scientist

biradaranjali23@email.com | +91 7619325056 | [LinkedIn](#) | [GitHub](#) | [Website](#)

Bidar, Karnataka, India

Summary

Results-driven Data Scientist proficient in key technologies (Python, SQL, Scikit-learn, Pandas, NumPy, Matplotlib) with experience in large-scale data analysis, predictive modeling, and machine learning solutions. Skilled in designing and deploying scalable data-driven applications and translating business requirements into actionable insights.

Education

B.Tech. in Computer Science,
Visvesvaraya Technological University (VTU)
CGPA: 8.25

Skills

- **Programming Languages:** Python, HTML, CSS, SQL
- **Data Science Libraries:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning:** Supervised & Unsupervised Learning, Deep Learning, Model Optimization
- **Tools:** Jupyter Notebook, Git, GitHub, VS Code, Tableau, Excel
- **Other:** Data Visualization, Feature Engineering, Statistical Analysis, Big Data Basics

Soft Skills

- Creativity, Communication, Leadership, Problem-Solving, Adaptability, Critical Thinking, Time Management, Attention to Detail

Languages Known

Kannada, English, Hindi

Projects

- **E-Virtual Study Assistant:** Developed a productivity platform for students using HTML, CSS, and JavaScript. Integrated lab notes and online courses feature to enhance student engagement.
 - **MedSync (Blockchain Hospital Management):** Engineered a supply chain hospital management platform with blockchain integration, leveraging Vite React and Tailwind CSS for frontend, Flask for backend, and Supabase (PostgreSQL) for data management. Ensured data integrity, transparency, and security across workflows by integrating blockchain technology.
 - **Iris Flower Classification:** Developed a predictive analytics solution using Python and Scikit-learn to classify Iris species. Experimented with multiple algorithms (Decision Tree, KNN, SVM, Logistic Regression) and optimized model accuracy.
 - **-Analysis-With-Python:** Analyzed unemployment trends using Python, leveraged time series forecasting and ARIMA models to generate insights for stakeholders and support informed decisions.
-

Experience

- **Data Science Intern – Code Alpha:** Collaborated on real-world data science projects including customer segmentation, predictive modeling, and report generation. Automated data cleaning and visualization tasks. Documented workflows and shared insights with cross-functional teams.
-

Courses

- Certified Data Science Intern, Code Alpha
 - Extensive personal learning: Fundamentals of Python, SQL, and core data science concepts
 - Advanced workshops in machine learning, deep learning, and predictive analytics
 - In-depth training on Scikit-learn, Pandas, NumPy, Matplotlib, and Seaborn
 - Practical experience with data visualization, model evaluation, and big data basics
-
